

RAPIDVIEW

Camera System

The "RapidView" is a standalone portable surveillance unit design to allow live and archived video monitoring. It consists of an array of video, archive and camera management processors that mounts to a rugged tripod in an IP67 enclosure and is integrated with any of the Silent Sentinel camera systems. The complete system includes a tripod, camera system and "RapidView" processors.

The Silent Sentinel "RapidView" will provide law enforcement and private entities a system that will allow RAPID setup for high quality video surveillance. The unit was designed to and incorporates the software to archive, stream and monitor the areas of interest from remote locations. We continue to allow management and access from a variety of remote communications devices, such as iPhones and tablets.

RAPIDVIEW Software Capabilities:

- Live Stream Encoding - H264, SD and HD
- Supports both IP and Analog Cameras
- Supports both Visual and Thermal Cameras
- Local and Remote Control
- Archives up to 128GB of Video Storage
- Pelco D Camera Protocol
- ONVIF-S Protocol
- iPhone/PC/Android Network Access
- Local Monitor and Touch Screen Controls

RAPIDVIEW Hardware Overview

The hardware solutions consists of up to three low power configuration and management tools to enable the remote video surveillance platform

Processor 1

Web, Camera Server, Console Controls and Configuration Management

Processor 2

H264 Encoder and Archive Unit capable of storing up to 128GB of video

Processor 2

Complete Network Support for Cellular, Fixed Wireless, and Private Networks

The Silent Sentinel Range

Silent Sentinel offer an extensive range of camera and lens configurations to meet your exact surveillance requirements.
